Good morning Joan,

I hope you had a relaxing Thanksgiving break with family!

Thanks to you and Tim for our follow-up discussion on Minnesota Superfund sites last week.

I will coordinate with our Closed Landfill Program staff to provide Stephanie and Terese the requested investigation data collected for the WDE Landfill site.

This data is public information so we are able to share it with your team and the South Andover RP group.

Thank you,

Tim

Tim Grape, PG | Supervisor

Hi Tim,  
Thanks for the chat last week.

Please see below.

I asked for an update from the South Andover RPM about the needed 1,4 dioxane sampling at the site, and her supervisor indicates (below) that we are awaiting the WDE landfill sampling results from the state, which folks think are needed to scope the South Andover sampling. Can you help get that information to our RPM, Stephanie Ross? I assume this is public information that can be shared with us and the PRPs at South Andover? Thanks. Let me know if we need to chat.

**Subject:** RE: South Andover

Hi Joan,

Stephanie is off today, but I texted her and she just confirmed that we are still waiting on the WDE landfill groundwater results, a groundwater elevation map, and the geology information from the State's three mobilizations.

In June, EPA requested that the PRP prepare a work plan to investigate for the presence of 1,4-dioxane and PFAS. The PRP refused, saying that they needed the data from the State's investigation in order to properly scope the work. As soon as we have the rest of the State's information, we can provide the data to the PRP and establish a timeline for a work plan and QAPP update.

Thank you,  
Terese

Terese,

Can Tim and I please get an update on the needed 1,4 dioxane groundwater sampling for the South Andover site? We spoke with MPCA management this morning and they emphasized the high profile nature of the 1,4 dioxane groundwater contamination in the nearby residential area, and asked us to make this needed work at South Andover a priority. Thanks.
